### Reminder – New Edit

**DN0006, Insurer FEIN, with  
Error Code 039, No Match on Database**

On July 16, 2018, VWC began verifying DN0006, Insurer FEIN, against the VWC database to ensure the Insurer FEINs received are valid. To be specific, we are validating on insurer FEIN only, not for specific policy information/dates, employer data correlating to the insurer FEIN, etc... but only to see if the insurer FEIN listed on the transaction is a valid insurer FEIN for a carrier that is licensed and registered to do business in Virginia.

This means if you submit a transaction with an insurer FEIN that is not a valid FEIN the transaction will reject instead of accept. This is the same process that causes the generation of the Invalid Insurer FEIN letters today.

### Missing BTC Letter

Have you ever received a Missing BTC letter and didn't really understand what it was all about?

This letter is to let you know a benefit previously reported is missing from the newly reported transaction. We send these letters because we want to make sure you intended to leave off the previously reported benefits. Some Claim Administrators do not realize that they are supposed to report all payments made to date and not just what was paid since the last transaction. Sending this letter alerts the Claim Administrators that a benefit is missing so they can file a subsequent transaction to correct the incorrect filing and to report all benefits paid to date.
